MISSOURI TECHNICAL GUIDE TRANSMITTAL NO. 405

The revised Missouri T&E Species Planning Matrix has been posted on the Missouri eFOTG in Section II-Natural Resource Information, F-Threatened and Endangered Species, 3-Conservation Planning Guidance.

The matrix serves as a guide for completing the MO-CPA-52 – Environmental Analysis for Conservation Planning. Conservation practices and their impact on T&E species are displayed on the matrix. If you encounter difficulty in judging the impact of a conservation practice on a T&E species, consult with your Area Office.

The matrix was revised to accompany the Endangered Species Act programmatic consultation that NRCS is pursuing with the United States Fish and Wildlife Service (FWS). The matrix was developed with inputs from MDC/FWS species experts. NRCS provided leadership and coordination throughout this revision.

The T&E Species Planning Matrix is a companion tool to the Missouri Natural Heritage Database adapted for NRCS use. These two tools can provide analysis for location of species/habitats of concern as well as the impacts of proposed actions.

If you have questions contact Pat Graham (573-876-0908).

A handwritten signature in black ink that reads "Roger A. Hansen".
